EDUCATION

NATIONAL UNIVERSITY OF SINGAPORE (NUS)	Singapore
Bachelor of Computing in Computer Science (Honours), Minor in Management	Expected May 2026
• Academic Standings: CAP 4.85 / 5.00 (First Class Honors equivalent) • Relevant Coursework: Product Management for Tech, Software Engineering, Design and Analysis of Algorithms, Data Analytics, Interaction Design, Enterprise Systems Architecture.	

PROFESSIONAL EXPERIENCE

GRAB	Singapore
Product Management Intern – GrabFood Growth	May 2025 – Aug 2025
• Owned the end-to-end product discovery and delivery of a new personalized merchant recommendation widget, resulting in a 14.2% increase in Click-Through Rate (CTR) and a 4.8% lift in checkout conversion rate over a 4-week A/B test involving 200k active users. • Conducted extensive user research and quantitative funnel analysis using SQL and Amplitude to identify a 22% drop-off at the cart page; formulated a PRD proposing optimized micro-copy and payment UX changes. • Collaborated closely with 6 Software Engineers, 1 UX Designer, and 2 Data Scientists across remote regions using Agile methodologies to run sprint grooming, standups, and retrospective sessions.	

SHOPEE	Singapore
Product Operations & Analytics Intern – ShopeePay	Jan 2025 – May 2025
• Analyzed regional transaction failure codes utilizing SQL and Tableau to pinpoint high-friction localized payment flows, implementing optimized checkout logic that reduced transaction failures by 8.5%. • Designed comprehensive telemetry dashboards tracking Daily Active Users (DAU), Monthly Active Users (MAU), and Gross Merchandise Value (GMV) metrics for cross-border payment features, saving stakeholders 5+ hours weekly in manual reporting. • Evaluated competitive landscaping and market positioning for local digital wallets across	

3 SEA countries to inform regional product roadmap prioritization for the upcoming financial year.

PRODUCT PROJECTS

NUS Orbital (Advanced Software Engineering Project)	May 2024 – Aug 2024
Product Lead & Full Stack Developer – "StudyBuddy" App	Apollo Level (Highest Tier)
- Conceived, designed, and launched a peer-to-peer study matching application used by 1,200+ active NUS students within 2 months of deployment. - Authored comprehensive user personas, user journey maps, and high-fidelity Figma prototypes to validate core feature sets before engineering deployment. - Built the application backend using Node.js and Express, implementing a matching algorithm that reduced the average user wait time to find peer partners by 40%.	

SKILLS & INTERESTS

Product Management: Product Requirements Documents (PRDs), User Research, Wireframing, A/B Testing, Feature Prioritization (RICE/MoSCoW), Agile/Scrum.

Data & Analytics: SQL (PostgreSQL, BigQuery), Python (Pandas, NumPy), Tableau, Amplitude, Mixpanel, Excel (Advanced).

Design & Development: Figma, HTML/CSS, JavaScript, Node.js, React, Git.

Languages & Interests: English (Fluent), Mandarin (Fluent). Passionate about FinTech trends, Case Competitions, and User-Centric Design.
